12/24/71

Dear Bud,

Something having nothing to do with you, your committee or Jim brings this to mind.

You have never done anything about my repeated quests for the return of all my materials not needed in the spectro appeal. You have told me Jim is suppose to do it, Jim has told me he either can't or doesn t have the time, and it doesn't get done.

Had your word been kept to begin with, this would not now be a problem for me. The problem has existed for a year and a half. I think that is much too long. It is that long since you aid you would straighten it out.

I hope you can now get it done promptly. I would hate for anything else that should not happen to happen.

Best,

This includes notifying those you've let rummage through your files that they may have taken what it was not yours to give and that they are not to use any of it without an ok. The last form of the proposed letter I saw was inadequate.
